PROFILE

I am a driven Computer Science major with a passion for problem-solving and innovative development. Proficient in DSA, Data Science, and Data Analysis, I combine analytical thinking with creativity to craft efficient solutions. My expertise spans full-stack development using the MERN stack, and I am deeply interested in Low-Level Design (LLD), striving to contribute to impactful projects in the field of computer science.

SKILLS

- MERN STACK
- PYTHON
- C++
- LOW LEVEL DESIGN (LLD)
- DATA SCIENCE
- MACHINE LEARNING
- DSA
- PROBLEM SOLVING
- HTML/CSS
- TAILWIND
- SQL
- GIT/GITHUB

PROJECTS

EDTECH PLATFORM

Developed an intuitive online learning platform using the MERN stack, designed to enhance educational accessibility and engagement through a seamless user experience.

INVOICE MAKER

Built an efficient invoice generator using the MERN stack, streamlining the creation and management of professional invoices. Designed for ease of use and robust functionality, it automates billing processes seamlessly.

CATS VS DOGS CLASSIFIER

Developed a web application with a Flask backend and CNN-based deep learning model for image classification. Users upload images to predict whether they contain a dog, cat, or are random, providing accurate and real-time results.

EDUCATION

PRIMARY SCHOOLING

The Scholar's English High School
GRADE : 82.40%

SECONDARY SCHOOLING

The Scholar's Junior College
GRADE : 66.15 2018-2020

GRADUATION

Saraswati College of Engineering

B.E in Computer Science
Engineering (Artificial Intelligence
and Machine learning)

2020-2024

CGPA : 7.47

EXPERIENCE

INTERNSHIP

DEVTOWN

(DEC 2021 - MARCH 2023)

- Data analytics
- Python, SQL
- Algorithms(ML)

CERTIFICATES

- LETTER OF RECOMMENDATION
- TRAINING CERTIFICATE(DATA SCIENCE)
